- WW027

MSRP

- \$49.99

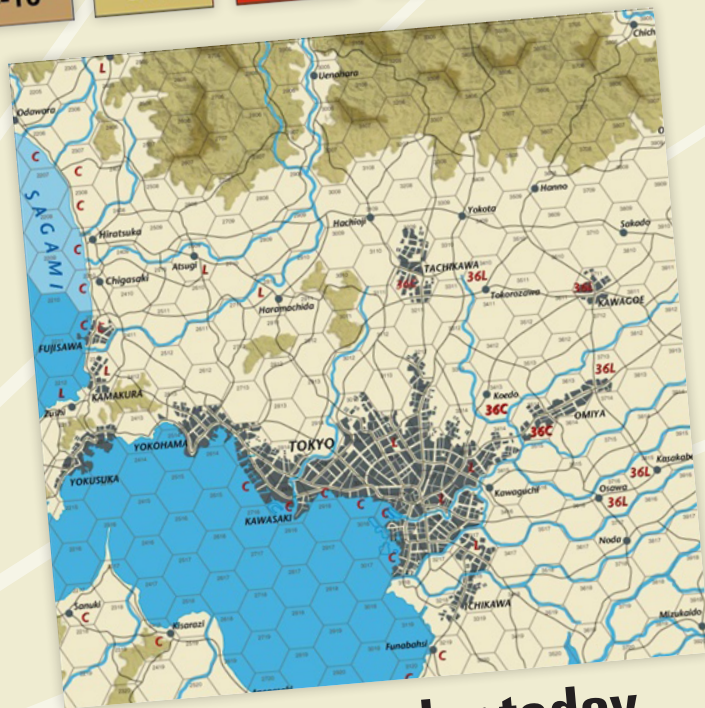

UPC Code

- 00928103010212

Contents

- Two 22 x 34 inch map
- 560 counters
- Magazine with historical background

Operations Olympic & Coronet is an update of the Olympic solitaire game first published in S&T along with a second complete game covering the planned follow-up invasion: Operation Coronet. The Olympic map has been updated to reflect better understanding of the tough and, in places, impassable terrain as well as the potential landing sites. The Coronet map shows the flat, wide-open Tokyo plain. The counters have also been updated with new information about the Japanese order of battle, especially their plan to move 36th Army to Kyushu as a counter-invasion force. With that, the Americans face a force intent on breaking through to the beach. Also added are: naval gunfire, atomic bombs, and even the Soviets (from a MOVES variant). The Japanese doctrine and supply rules have been updated to better reflect their historic plan for an initial counterattack. The kamikaze rules are also updated with further research into their probable effects.
