

Wellington's Victory Errata Counters

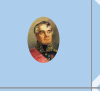

as of 19 September 2015

We are planning to print these this fall. We have room for 40 as displayed below. The counters on the sheet include those noted on page 5 of the rules and few others found since (Lobau's combat rating was half white on some sheets, so may be unnecessary for some of you). Please let us know ASAP if you find any others so we can include them. Any blanks will be used for additional markers.
